PROFESSIONAL SUMMARY

Motivated B.Tech student specializing in Artificial Intelligence and Data Science with hands-on experience in web development, data science, machine learning, and Java-based problem solving. Skilled in developing responsive web applications, working with databases, and building practical software projects. Strong interest in data analytics, machine learning, AI tools, and software development with a continuous-learning mindset and strong problem-solving abilities.

TECHNICAL SKILLS

Programming: Java, JavaScript, Python, SQL
Web Development: React.js, HTML, CSS, Tailwind CSS
Data Science & Machine Learning: Data Analysis, Machine Learning, Scikit-learn, Pandas, NumPy, Data Preprocessing, Exploratory Data Analysis, Classification, Regression
Databases: MongoDB, MySQL, Firebase
Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, XAMPP, Vercel
AI & Cloud: AWS Data Engineering, Generative AI, AI/ML
Embedded Systems: Arduino

EDUCATION

Qualification	Institution / Details	Year	Percentage
B.Tech	Artificial Intelligence & Data Science, Mother Theresa Institute of Engineering and Technology, JNTUA	2027	75%
Intermediate	Mother Theresa Junior College, Palamaner **Group: MPC**	2023	70%
10th	J.M.J E.M. School,Guttur	2021	88%

INTERNSHIP EXPERIENCE

CodeAlpha — Data Science & Machine Learning Intern

- Worked on practical data science and machine learning tasks using Python and Jupyter Notebook.
- Performed data cleaning, preprocessing, exploratory data analysis, and feature preparation using Pandas and NumPy.
- Developed and evaluated classification and regression models using Scikit-learn.

Vaultsphere AI Technologies — Intern

- Worked on practical technical tasks involving data, software development, and AI-related technologies.
- Applied programming and analytical skills to support project-based activities.
- Collaborated with team members and gained practical exposure to industry-oriented workflows.

PROJECTS

Smart Campus

- Developed a web-based smart campus platform to manage and organize campus-related information and activities.
- Implemented responsive interfaces using HTML, CSS, JavaScript, and React.js.

Vinay E-Commerce

- Developed an e-commerce web application with product browsing and user-friendly interfaces.
- Used React.js, HTML, CSS, and JavaScript for responsive front-end development.

Traffic Accident Hotspot Analyzer

- Analyzed traffic accident data to identify accident-prone locations and patterns.
- Applied Python, Pandas, NumPy, and data visualization techniques for data analysis.

Student Prediction System

- Developed a machine learning-based system to analyze student data and predict academic outcomes.
- Applied data preprocessing, feature preparation, and machine learning techniques using Python and Scikit-learn.

ACADEMIC PROJECT

Academic Traffic Light System using Arduino

- Designed and implemented a traffic light control system using Arduino.
- Programmed traffic signal sequences and timing logic for automated operation.
- Gained practical experience in embedded systems, hardware interfacing, and Arduino programming.

CERTIFICATIONS

- **NPTEL Certificate** — IIOT-86% — Elite
- **EduSkills AWS Data Engineering** — Completed, Cohort 13
- **EduSkills AWS Generative AI** — Completed, Cohort 14
- **EduSkills Google AI-ML** — Completed, Cohort 15
- **EduSkills ANSYS Fluid Dynamics** — Completed, Cohort 16
- **EduSkills Blue Prism Intelligent Automation** — Completed, Cohort 8
- **CodeAlpha Data Science Internship & Machine Learning Projects**

ACHIEVEMENTS & CODING

- Solved Data Structures and Algorithms challenges on LeetCode using Java.
- Maintained an active GitHub portfolio with academic and personal projects.
- Secured a prize in a 24-hour live hackathon.
- Participated in collaborative technical activities and project-based learning.
